

Course on Trends in Gastrointestinal and Pancreatic Neuroendocrine Tumour Clinical Care

1-2 October 2024

HUONE Copenhagen, Kastrup, Denmark

Would you like to gain a wider and deeper understanding of the management of patients with neuroendocrine neoplasms (NEN)?

Join us at this course to enhance your awareness of various aspects of NEN, with an emphasis on recognizing indicative symptoms, understanding the diagnostic process, exploring treatment options, and learning about the prognosis.

Over the course of two days you will hear lectures from renowned national and international speakers and participate in hands-on case-work. You will work in groups on several relevant cases and share your knowledge with each other through peer-to-peer learning exercises guided by experts.
