

## Press release

Please fill in this form and return it to [graduateschoolhealth@au.dk](mailto:graduateschoolhealth@au.dk) in Word format no later than three weeks prior to your defence.

### Basic information

Name: Mathias Kaas Ollendorff

Email: mko@biomed.au.dk Phone: 20964926

Department of: Biomedicine

Main supervisor: Simon Glerup

Title of dissertation: Molecular studies of the synaptic receptors LAR, SorCS2 and NRXN1 $\beta$

Date for defence: May 24<sup>th</sup>, 2024 at (time of day): 14:00 Place: Lille Anatomisk Auditorium

Press release (Danish)

Molekylære studier af de synaptiske receptorer LAR, SorCS2 og NRXN1 $\beta$

Nerveceller kommunikerer primært via synaptiske forbindelser. Dynamiske forandringer af synapsernes molekylære opbygning er grundlæggende for indlæring og hukommelse mens dysregulering af disse processer kan forårsage psykiatriske og neurologiske sygdomme. Denne PhD afhandling undersøgte de synaptiske receptorer LAR, SorCS2 og NRXN1 $\beta$  der alle er vigtige for dannelsen af synaptiske forbindelser. Ved brug af genetisk data fra psykiatriske patienter viser vi, at nøglefunktioner af den synaptiske adhesionsreceptor LAR bliver kompromitterede af missense mutationer fra psykiatriske patienter. Desuden viser vi, at SorCS2 interagerer med alle tre NRXN $\beta$  varianter og kortlægger bindingsmekanismen ved brug af computationelle struktur modeller og eksperimentielle bindingsforsøg. Disse studier har bidraget med ny viden om funktionelle og patologiske roller af synaptiske receptorer og deres mulige rolle i udviklingen af psykiatriske sygdomme.

Projektet er gennemført af Mathias Kaas Ollendorff, der forsvarer det d. 24/05-2024

Forsvaret af ph.d.-projektet er offentligt og finder sted den 24/05-2024 kl. 14 i Lille Anatomisk Auditorium, Aarhus Universitet, Universitetsparken 231, 8000 Aarhus. Titlen på projektet er "Molecular studies of the synaptic receptors LAR, SorCS2 and NRXN1 $\beta$ ".

bedømmelsesudvalget  
Department of Biomedicine, Aarhus University, Høegh Guldbergsgade 10, 8000 Aarhus C, Denmark

Press release (English)

### Molecular studies of the synaptic receptors LAR, SorCS2 and NRXN1 $\beta$

Synapses are the primary site of communication between neurons and dynamic changes in their molecular machinery is responsible for learning and memory and their dysregulation can cause development of psychiatric and neurological disorders.

This PhD thesis studied the synaptic receptors LAR, SorCS2 and NRXN1 $\beta$  that are strongly associated to psychiatric disorders. Using genetic insights from patients diagnosed with such disorders, we show that key functions of the synaptic adhesion receptor LAR are perturbed by missense variation.

Additionally, screening of a library of synaptic receptors revealed that SorCS2 preferentially interacts with NRXN $\beta$ s and by using computational structural biology and biophysical assays, we determine the NRXN1 $\beta$ -SorCS2 interaction site. The thesis has provided novel insights to the functional roles of these synaptic receptors as well as their potential role in the molecular basis of psychiatric disorders.

The project was carried out by Mathias Kaas Ollendorff, who is defending his dissertation on May 24<sup>th</sup>, 2024.

The defence is public and takes place on May 24<sup>th</sup> at 2 pm in Lille Anatomisk Auditorium, Aarhus University, Universitetsparken 231, 8000 Aarhus. The title of the project is "Molecular studies of the synaptic receptors LAR, SorCS2 and NRXN1 $\beta$ ".

#### Assessment committee:

Associate Prof. Olav Michael Andersen - chairman of the committee and moderator of the defence  
Department of Biomedicine, Aarhus University, Høegh Guldbergsgade 10, 8000 Aarhus C, Denmark

Professor Tomi Rantamäki,  
Laboratory of Neurotherapeutics, Drug Research Program, Division of Pharmacology and  
Pharmacotherapy, Faculty of Pharmacy, University of Helsinki, Viikinkaari 5E, 00790, Helsinki  
Finland

Principal Investigator Luís Ribeiro,  
CNC-UC and MIA-Portugal, University of Coimbra, Universidade de Coimbra-FMUC, Polo I, Rua  
Larga, 3004-504 Coimbra, Portugal

Associate Prof. Simon Glerup - main supervisor, non-voting member of the committee  
Department of Biomedicine, Aarhus University, Høegh Guldbergsgade 10, 8000 Aarhus C, Denmark

#### Permission

By sending in this form:

- I hereby grant permission to publish the above Danish and English press releases.
- I confirm that I have been informed that any applicable inventions shall be treated confidentially and shall under no circumstances whatsoever be published, presented or mentioned prior to submission of a patent application, and that I have an obligation to inform my head of department and the university's Patents Committee if I believe I have made an invention in connection with my work. I also confirm that I am not aware that publication violates any other possible holders of a copyright.
